Sub-Scheme**

DIRECTORATE OF ECONOMICS & STATISTICS
Nagaland: Kohima

Government of Nagaland

DISTRICT DOMESTIC PRODUCT OF NAGALAND

(2019 - 20 to 2022-23)

Conducted under Support for Statistical Strengthening (SSS) Sub-Scheme

DIRECTORATE OF ECONOMICS & STATISTICS
Nagaland: Kohima

Preface

District level planning has assumed greater importance with government's focus on district-specific schemes such as Aspirational District Programme to achieve Viksit Bharat. Sub-state level data is essential to address inter-district disparity, without which developed status cannot be attained. Against the stated backdrop, the Department of Economics and Statistics has come up with the report, District Domestic Product of Nagaland, which is the result of a project undertaken as part of the central sector scheme, Support for Statistical Strengthening Scheme.

The current report presents the comparative macroeconomic scenarios of the districts of the state, with sectoral insights as well as per capita income. It is expected that the Report will help the policy makers in shaping district level policies, allocating resources efficaciously, prioritizing backward areas and optimizing planning formulation through the availability of disaggregated data at the sub-state level.

I sincerely acknowledge the invaluable contributions of the officers and staff of the Department for their untiring effort in bringing out this salient report.

It is hoped that the report will be of use to researchers, policy makers, planners, administrators and other stakeholders.

Date: 06/04/2026

Nagaland: Kohima

Foreword

The Report, *District Domestic Product of Nagaland*, presents the economic size and economic structure of the districts of the state. It is a significant contribution to informed and effective policy making, especially towards bringing a balanced regional development in the state. It is hoped that the report will be of immense utility to researchers, policy makers, planners, administrators and other stakeholders.

The much useful report is made possible by the collective efforts of the officers and staff of the Department. I therefore sincerely acknowledge them for their invaluable contributions towards bringing out the report.

I hope that the report will be of utility to policy practitioners, scholars, administrators and other stakeholders.

Date: 23/04/2026
Place: Kohima

(AKUNU S MEYASE), IAS
Secretary to the Government of Nagaland

Executive Summary

1. GSDP at constant price, which is also taken as the real growth of the economy, increased from Rs.1847679 lakh during 2019-20 to Rs. 1954320 lakh during 2022-23.
2. Structurally, Nagaland's economy is a tertiary sector driven economy. The contributory share of the tertiary sector increased from 58.79 percent during 2011-12 to 61.75 during 2022-23.
3. GDDP at constant price for Dimapur increased from Rs.543611 lakhs during 2019-20 to Rs. 553325 during 2022-23.
4. GDDP at constant price for Kiphire increased from Rs.72520 lakh during 2019-20 to Rs.83825 during 2022-23.
5. Kohima recorded a consistent increase in GDDP from Rs. 2,14,785 lakh during 2019-20 to Rs. 307924 lakh during 2022-23.
6. The GDDP of Longleng increased from Rs. 62,112 lakh during 2019-20 to Rs. 85894 lakh during 2022-23.
7. Mokokchung's GDDP declined from Rs. 1,63,361 lakh in 2019-20 to Rs. 1,28,040 lakh in 2022-23.
8. GDDP at constant price for Mon increased from Rs 159975 lakh during 2019-20 to Rs 166981 during 2022-23.
9. GDDP at constant price for Peren increased from Rs. 91984 lakh during 2019-20 to Rs.114662 during 2022-23.
10. GDDP at constant price for Phek increased from Rs 107618 lakh during 2019-20 to Rs 124735 during 2022-23.
11. GDDP at constant price for Tuensang increased from Rs 138912 lakh during 2019-20 to Rs 175109 during 2022-23.

12. GDDP at constant price for Wokha decreased from Rs.136816 lakh during 2019-20 to Rs.112296 during 2022-23.
13. GDDP at constant price for Zunheboto decreased from Rs 155983 lakh during 2019-20 to Rs 96322 during 2022-23.

Chapter One

INTRODUCTION

1. INTRODUCTION TO GROSS STATE DOMESTICS PRODUCT (GSDP):

1.1 Gross State Domestics Product (GSDP):

1.1.1 Gross State Domestic Product is one of the most important indices which indicates the level of development achieved by a state. GSDP not only portrays the current structure of the economy, but also the structural changes that have been taking place in the economy over a period of time. GSDP also helps in estimating the Per Capita Income (PCI) of the state. PCI in turn is used for evaluating the living standard/condition of the people.

1.1.2 Globally, the estimates of GDP/GSDP are compiled on the basis of the principles as envisaged in the United Nations' System of National Accounting 2008 (UN-SNA 2008). The UN-SNA 2008 is revised from time to time to expand the coverage of the emerging economic activities as well as to eliminate those which have become obsolete. Currently, SNA-2008 is the guiding principles followed globally while arriving at the national income estimates. The GSDP of Nagaland is compiled and estimated by Directorate of Economics and Statistics under the technical guidance of National Accounts Division (NAD), Central Statistical Office (CSO), Ministry of Statistics & Programme Implementation, Government of India.

1.2 Structure of economy:

Depending on the nature of occupations and economic activities being undertaken, the entire economy is divided into the following three sectors:

- i. *Primary sector:* It comprises of all the economic activities that directly make use of natural resources in the production process.
- ii. *Secondary sector:* It comprises of all the activities that transform one form of goods into another form of goods.
- iii. *Tertiary sector:* It comprises of the activities that provide services.

1.3 Methodologies for SDP estimation:

Theoretically, GSDP can be obtained by adopting either one of the three following approaches: -

- i. Production/Output Approach
- ii. Income Approach
- iii. Expenditure Approach

1.3.1 Production/Output Approach:

According to this method, the aggregate production of goods and services are multiplied with their respective prices to arrive at GSDP.

1.3.2 Income Approach:

According to this method, the income accruing to all the factors of production in the forms of compensation to employees, rent, interest, profit, etc. during the process of production are aggregated to arrive at GSDP.

1.3.3 Expenditure Approach:

According to this method, GSDP is arrived at by summing all the expenditures incurred on the purchases of final goods and services.

1.3.4 A combination of all the three approaches is used for estimating the GDP/GSDP in India. Theoretically, although the three different approaches to GSDP estimation arrive at the same conclusion. However, for practical calculation of GSDP, while production approach is the most suitable approach for estimating primary sector, income and expenditure approaches are more suitable for estimating secondary and tertiary sectors. Presently, the GDP/GSDP estimates in India are compiled annually with 2011-2012 as the base year.

1.4 Gross State Domestic Product (GSDP) at market price:

GSDP at market price is simply the summation of the GSVA of the primary, secondary and tertiary sectors plus indirect taxes less subsidies.

$$\text{GSDP at market price} = \sum_{i=1}^3 \text{GSVA} + \sum_{i=1}^n \text{indirect taxes} - \sum_{i=1}^n \text{subsidies}$$

Where, Σ = Summation

$$\sum_{i=1}^3 \text{GSVA} = \text{GSVA Primary} + \text{GSVA Secondary} + \text{GSVA Tertiary}$$

$$i = 1+2+3+\dots\dots\dots+n$$

Note: All the GSDP estimates of 2011-12 series are at market price.

Chapter Two

GROSS STATE DOMESTIC PRODUCT OF NAGALAND

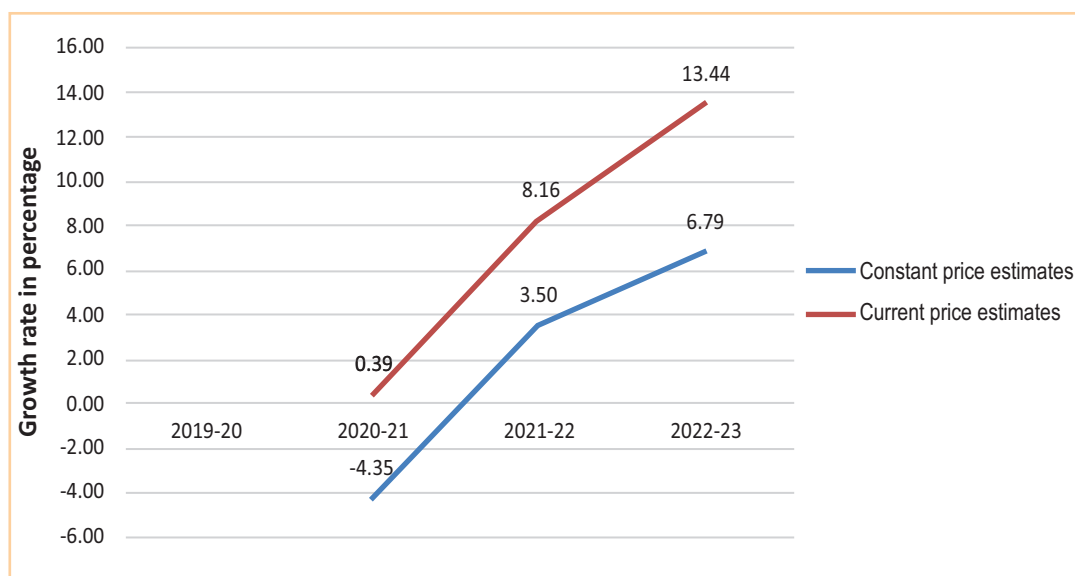

2. GSDP AT CONSTANT PRICE:

- 2.1. GSDP at constant price, which is also taken as the real growth of the economy, increased from Rs.1847679 lakh during 2019-20 to Rs. 1953406 lakh during 2022-23. The year-wise GSDP value and growth rate from 2019-20 to 2022-23 is presented in Table-2.1 and the growth rate is graphically represented in Figure-2.1.

Table-2.1: GSDP of Nagaland

Year	Current Price Estimates		Constant Price Estimates	
	GSDP (in Rs. lakh)	Growth rate (in percentage)	GSDP (in Rs. lakh)	Growth rate (in percentage)
2019-20	2971587	-	1847679	-
2020-21	2983164	0.39	1767309	-4.35
2021-22	3226538	8.16	1829215	3.50
2022-23	3660127	13.44	1953406	6.79

Figure-2.1: GSDP Growth Rate of Nagaland

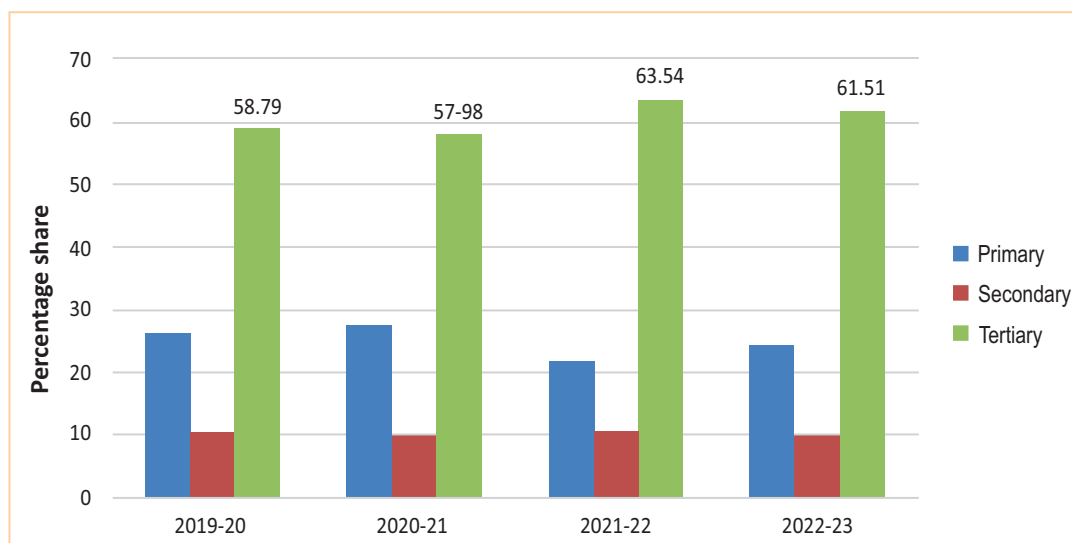

2.2 SECTORAL CONTRIBUTION TO GROSS STATE VALUE ADDED (GSVA):

2.2.1. Structurally, Nagaland's economy is a tertiary sector driven economy. The contributory share of the tertiary sector increased from 58.79 percent during 2011-12 to 61.75 during 2022-23. During 2022-23, the contributory shares of the primary, secondary and tertiary sectors to GSVA were 24.35 percent, 9.75 percent and 61.51 percent respectively. The year wise respective contributory shares of the three sectors from 2019-20 to 2022-23 are presented in Table-2.2 and Figure-2.2.

Table-2.2: Percentage Sectoral contribution to GSVA at constant price from 2019-20 to 2022-23

Year/Sector	2019-20	2020-21	2021-22	2022-23
Primary	26.37	27.43	21.72	24.35
Secondary	10.47	9.73	10.36	9.75
Tertiary	58.79	57.98	63.54	61.51

Figure 2.2: Percentage Sectoral contribution to GSVA at constant price from 2011-12 to 2022-23

2.3. PER CAPITA INCOME OF NAGALAND:

2.3.1. Per capita income (PCI) is an average measurement of income which is supposed to be received by each individual if the income of the state is distributed among the

total population of the state. It is calculated by dividing the total income of the state by the total population of the state. PCI is often used as an indicator of the standard of living of the people. The year wise PCI of Nagaland from 2019-20 to 2022-23 is presented in Table-2.3.

Table-2.3: Per Capita Income (PCI) of Nagaland

Year	2019-20	2020-21	2021-22	2022-23
PCI	85501	119781	127224	143889

Chapter Three

DISTRICT DOMESTIC PRODUCT

3.1. INTRODUCTION:

- 3.1.1.** District Domestic Product (DDP) is the total monetary value of all the goods and services produced within a district. DDP is a vital indicator of the level of development of a district. The estimated DDP also throws light on the disparity in development among the districts within a state. Moreover, it is through the DDP that the per capita income of a district is estimated.
- 3.1.2.** The Sub-national Income Committee on National Income emphasized the importance of DDP, and thereby suggested all the states to make concerted efforts in estimating DDP. In pursuant to the Committee's suggestion, the Directorate of Economics & Statistics (DES) initiated the estimation of DDP under the Support for Statistical Strengthening sub-scheme, a central sector scheme implemented by the Department.
- 3.1.3.** The estimation of DDP, being a new exercise undertaken by DES is brought out only for the period 2019-20 to 2022-23 with 2011-12 as the base year.

ESTIMATED DISTRICT DOMESTIC PRODUCT:

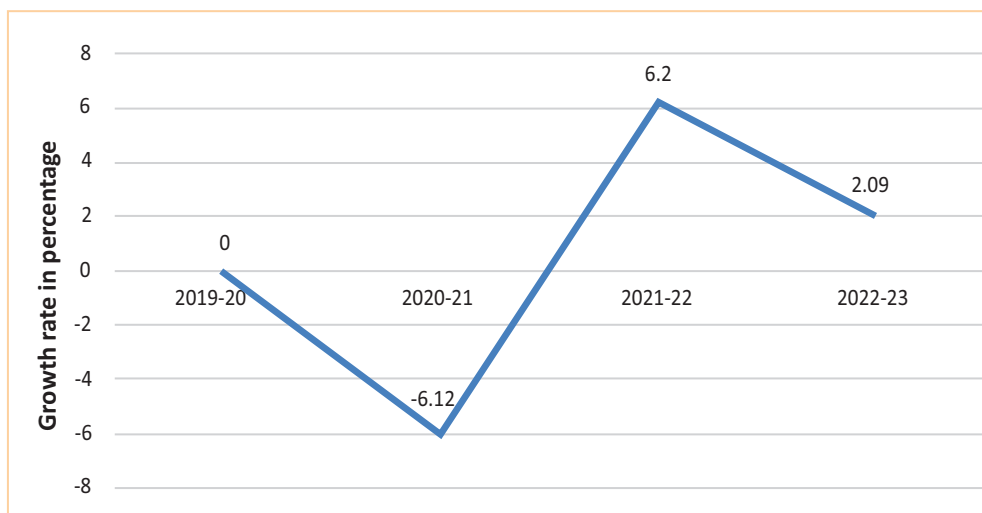

3.2 DIMAPUR:

Gross District Domestic Product (GDDP) at constant price:

- 3.2.1** GDDP at constant price for Dimapur, which can be understood as the size of the district's economy, increased from Rs.543611 lakhs during 2019-20 to Rs. 553325 during 2022-23. The year-wise GDDP value and growth rate from 2019-20 to 2022-23 are presented in Table-3.1 and the growth rate in Figure-3.1.

Table-3.1: GDDP of Dimapur

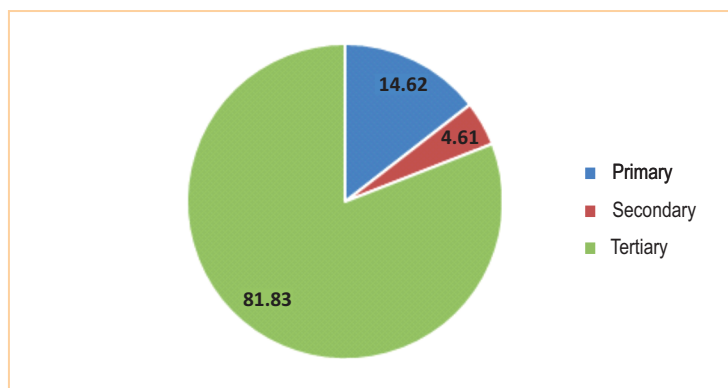

Year	Constant Price Estimates	
	GDDP (in Rs. Lakh)	Growth rate (in percentage)
2019-20	543611	-
2020-21	510322	-6.12
2021-22	541980	6.20
2022-23	553325	2.09

Figure 3.1: GDDP Growth Rate of Dimapur**Sectoral Contribution to Gross District Domestic Product (GDDP):**

3.2.2. Structurally, Dimapur's economy is a tertiary sector driven economy. The contributory share of the tertiary sector was 81.83 percent during 2022-23. The sectoral contribution to GDDP for the period 2022-23 is presented in Table-3.2 and graphically represented in Figure-3.2.

Table-3.2: Percentage Sectoral contribution to GDDP at constant price for 2022-23

Year/Sector	2022-23
Primary	14.62
Secondary	4.61
Tertiary	81.83

Figure 3.2: Percentage Sectoral contribution to GDDP at constant price for 2022-23

Per Capita Income of Dimapur:

3.2.3. Per capita income (PCI) is simply an average measurement of income which is supposed to be received by each individual if the income of the state is distributed among the total population of the state. It is calculated by dividing the total income of the state by the total population of the state. PCI is often used as an indicator of the standard of living of the people. The year wise PCI of Dimapur from 2019-20 to 2022-23 is presented in Table-3.3.

Year	2019-20	2020-21	2021-22	2022-23
PCI	85501	183630	177005	211207

3.3 KIPHIRE:**Gross District Domestic Product (GDDP) at constant price:**

3.3.1 GDDP at constant price for Kiphire, which can be understood as the size of the district's economy, increased from Rs.72520 lakh during 2019-20 to Rs. 83825 during 2022-23. The year-wise GDDP value and growth rate from 2019-20 to 2022-23 are presented in Table-3.4 and the growth rate in Figure 3.3.

Table-3.4: GDDP of Kiphire

Year	Constant Price Estimates	
	GDDP (in Rs. lakh)	Growth rate (in percentage)
2019-20	72520	
2020-21	83169	14.68
2021-22	86184	3.63
2022-23	83825	-2.74

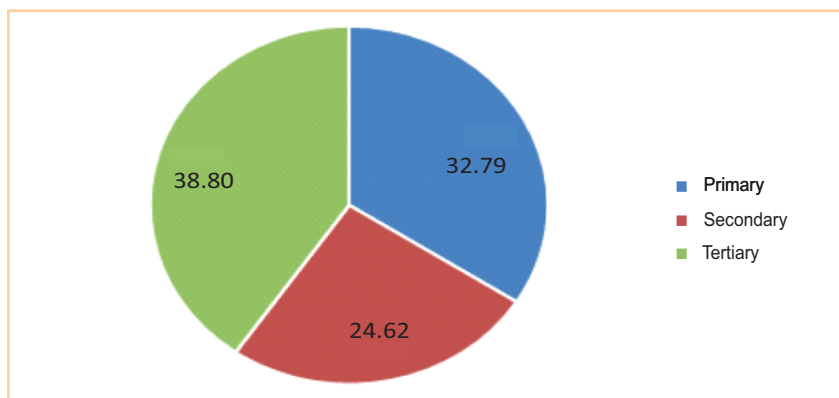

Figure 3.3: GDDP Growth Rate of Kiphire

Sectoral Contribution to Gross District Domestic Product (GDDP):

3.2.2. Kiphire's economy is largely tertiary-sector driven, with the tertiary sector contributing 38.80 per cent of GDDP in 2022–23. The primary and secondary sectors contributed 32.79 per cent and 24.62 per cent respectively (Figure-3.4). The sectoral contribution to GDDP for the year 2022-23 is presented in Table-3.5.

Table-3.5: Percentage Sectoral contribution to GDDP at constant price for 2022-23

Year/Sector	2022-23
Primary	32.79
Secondary	24.62
Tertiary	38.80

Figure 3.4: Percentage Sectoral contribution to GDDP at constant price for 2022-23**Per Capita Income of Kiphire:**

3.2.3. Per capita income (PCI) is simply an average measurement of income which is supposed to be received by each individual if the income of the state is distributed among the total population of the state. It is calculated by dividing the total income of the state by the total population of the state. PCI is often used as an indicator of the standard of living of the people. The year wise PCI of Kiphire from 2019-20 to 2022-23 is presented in Table-3.6.

Year	2019-20	2020-21	2021-22	2022-23
PCI	122839	134044	152082	141175

3.4 KOHIMA:

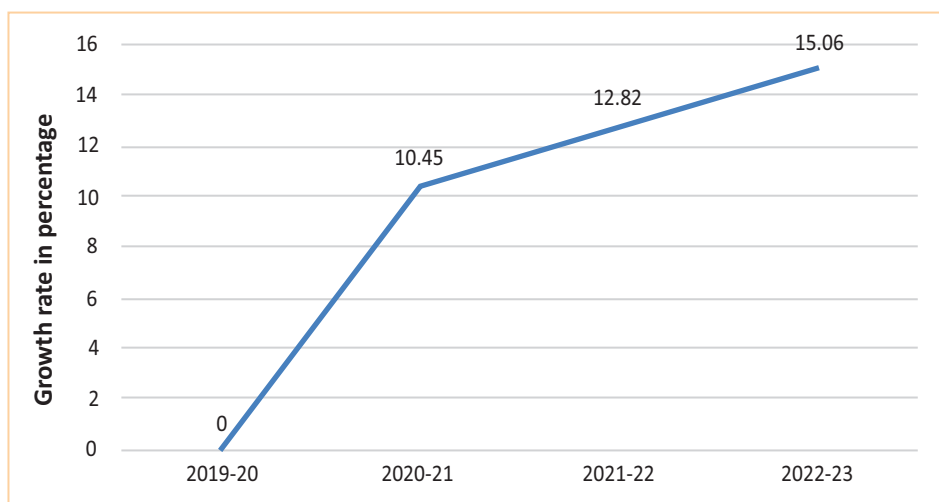

Gross District Domestic Product (GDDP) at constant price:

- 3.4.1** Kohima recorded a consistent increase in GDDP from Rs. 2,14,785 lakh during 2019–20 to Rs. 307924 lakh during 2022–23. The district registered positive growth throughout the period, indicating steady expansion in economic activities, particularly after 2020–21. The year-wise GDDP value and growth rate from 2019-20 to 2022-23 is presented in Table-3.7 and the growth rate in Figure 3.5.

Table-3.7: GDDP of Kohima

Year	Constant Price Estimates	
	GDDP (in Rs. lakh)	Growth rate (in percentage)
2019-20	214785	-
2020-21	237220	10.45
2021-22	267623	12.82
2022-23	307924	15.06

Figure 3.5: GDDP Growth Rate of Kohima

Sectoral Contribution to Gross District Domestic Product (GDDP):

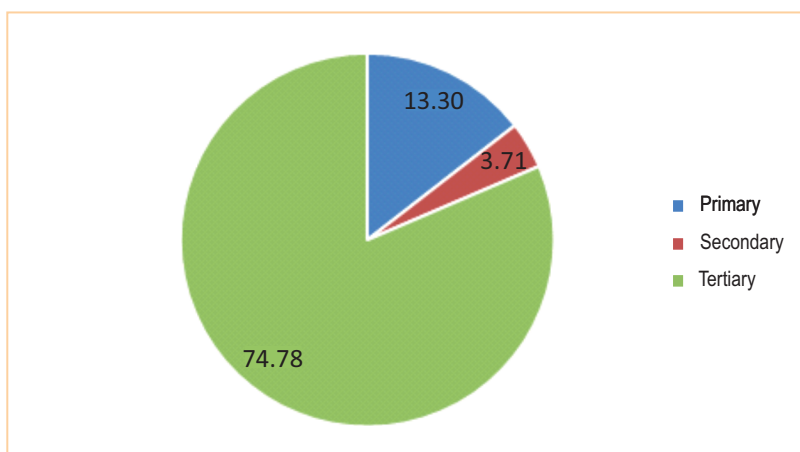

- 3.4.2.** The economy of Kohima is dominated by the tertiary sector, which contributed 74.78 per cent of GDDP in 2022–23. The primary and secondary sectors accounted for 13.30 per cent and 3.71 per cent respectively, indicating Kohima's role as the

administrative and service centre of the State (Figure 3.6). The sectoral contribution to GDDP during 2022-23 is presented in Table-3.8.

Table-3.8: Percentage Sectoral contribution to GDDP at constant price for 2022-23

Year/Sector	2022-23
Primary	13.30
Secondary	3.71
Tertiary	74.78

Figure 3.6: Percentage Sectoral contribution to GDDP at constant price for 2022-23

Per Capita Income of Kohima:

3.4.3. Per capita income (PCI) is simply an average measurement of income which is supposed to be received by each individual if the income of the state is distributed among the total population of the state. It is calculated by dividing the total income of the state by the total population of the state. PCI is often used as an indicator of the standard of living of the people. The year wise PCI of Kohima from 2019-20 to 2022-23 is presented in Table-3.9.

Table-3.9: Per Capita Income (PCI) of Kohima (in Rs)

Year	2019-20	2020-21	2021-22	2022-23
PCI	100024	110582	136713	158499

3.5. LONGLENG:

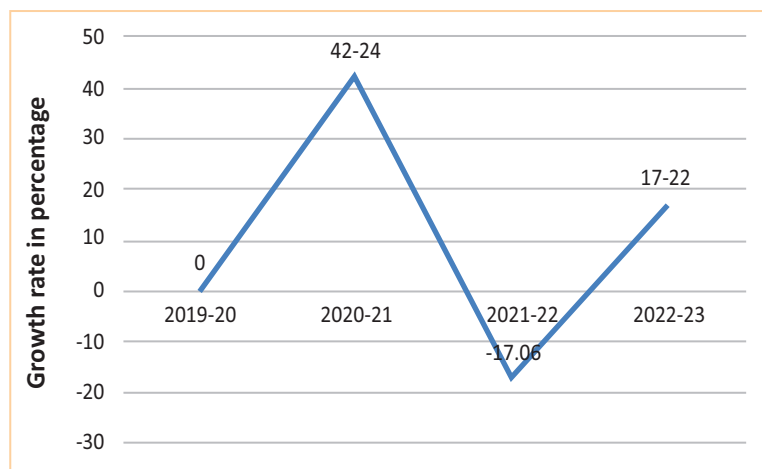

Gross District Domestic Product (GDDP) at constant price:

3.5.1 The GDDP of Longleng increased from Rs. 62,112 lakh during 2019–20 to Rs. 85,894 lakh during 2022–23. The district experienced high growth in 2020–21, followed by a contraction during 2021–22, and a subsequent recovery during 2022–23. The year-wise GDDP value and growth rate from 2019-20 to 2022-23 are presented in Table-3.10 and the growth rate in Figure-3.7.

Table-3.10: GDDP of Longleng

Year	Constant Price Estimates	
	GDDP (in Rs. lakh)	Growth rate (in percentage)
2019-20	62112	
2020-21	88350	42.24
2021-22	73274	-17.06
2022-23	85894	17.22

Figure 3.7: GDDP Growth Rate of Longleng

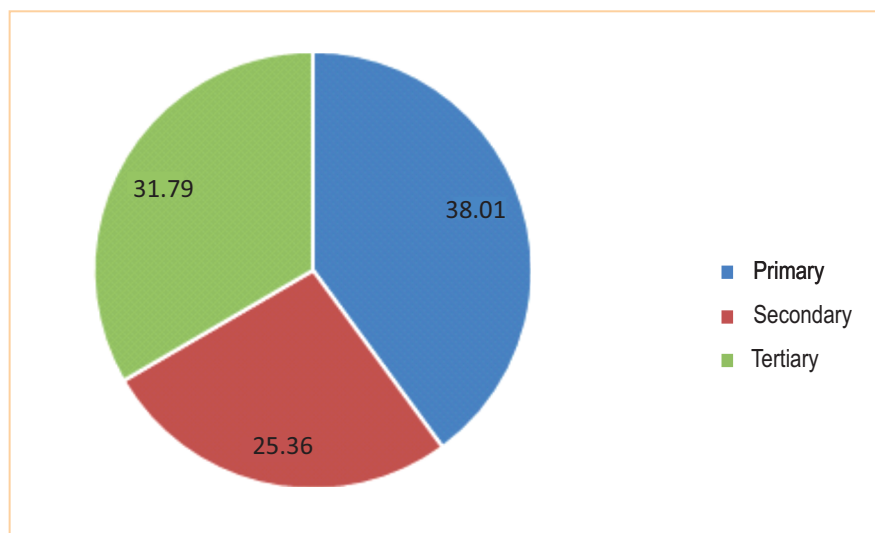

Sectoral Contribution to Gross District Domestic Product (GDDP):

3.5.2. Longleng has a primary-sector-driven economy. During 2022–23, the primary sector contributed 38.01 per cent of GDDP, followed by the secondary sector at 25.36 per cent and the tertiary sector at 31.79 percent (Figure-3.8). The sectoral contribution to GDDP during 2022-23 is presented in Table-3.11.

Table-3.11: Percentage Share Sectoral contribution to GDDP at constant price for 2022-23

Year/Sector	2022-23
Primary	38.01
Secondary	25.36
Tertiary	31.79

3.6 MOKOKCHUNG:

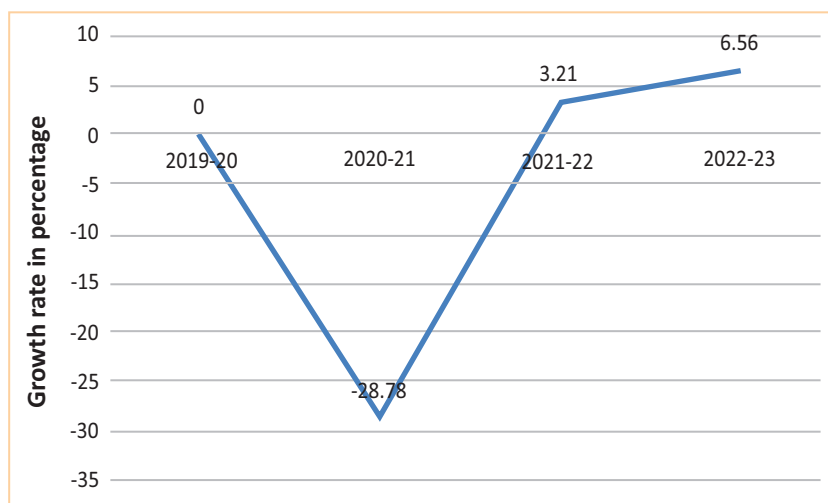

Gross District Domestic Product (GDDP) at constant price:

3.6.1 Mokokchung's GDDP declined from Rs. 1,63,361 lakh in 2019–20 to Rs. 128040 lakh in 2022–23. A sharp contraction was observed in 2020–21, followed by modest recovery in subsequent years.. The year-wise GDDP value and growth rate from 2019-20 to 2022-23 is presented in Table-3.13 and the growth rate in Figure-3.9.

Table-3.13: GDDP of Mokokchung

Year	Constant Price Estimates	
	GDDP (in Rs. lakh)	Growth rate (in percentage)
2019-20	163361	-
2020-21	116423	-28.73
2021-22	120162	3.21
2022-23	128040	6.56

Figure 3.9: GDDP Growth Rate of Mokokchung

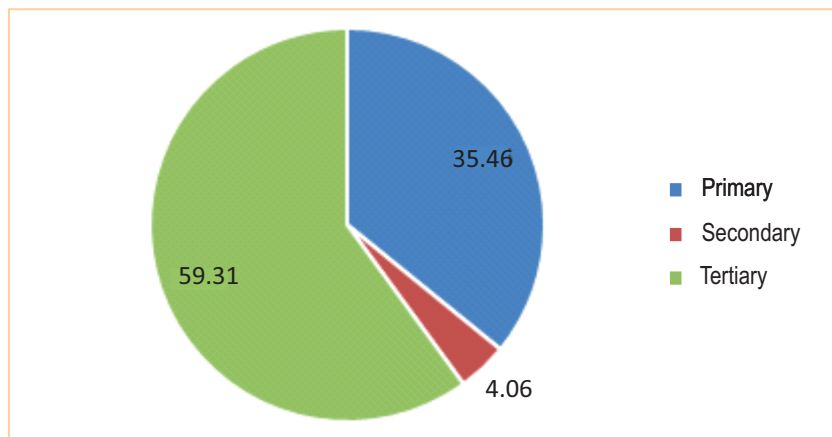

Sectoral Contribution to Gross District Domestic Product (GDDP):

3.6.2. Structurally, Mokokchung's economy is a tertiary sector driven economy. The contributory share of the tertiary sector was 59.31 percent during 2022-23 (Figure-3.10). The sectoral contribution to GDDP during 2022-23 is presented in Table-3.14.

Table-3.14: Percentage Sectoral contribution to GDDP at constant price for 2022-23

Year/Sector	2022-23

Year	2019-20	2020-21	2021-22	2022-23
PCI	77738	69129	83110	104884

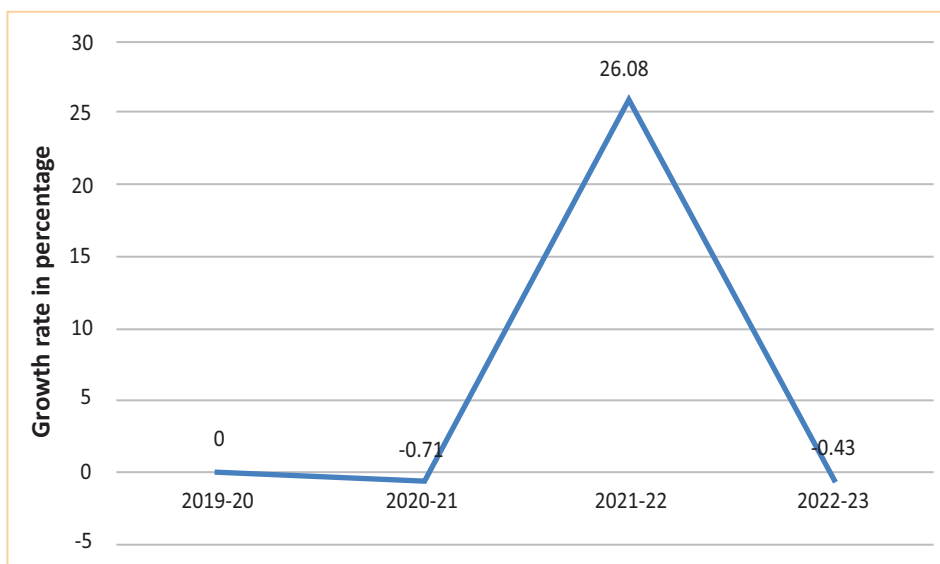

3.8 PEREN:**Gross District Domestic Product (GDDP) at constant price:**

3.8.1 GDDP at constant price for Peren, which can be understood as the size of the district's economy, increased from Rs. 91984 lakhs during 2019-20 to Rs. 114662 during 2022-23. The year-wise GDDP value and growth rate from 2019-20 to 2022-23 is presented in Table-3.19 and the growth rate in Figure 3.13.

Table-3.19: GDDP of Peren

Year	Constant Price Estimates	
	GDDP (in Rs. lakh)	Growth rate (in percentage)
2019-20	91984	-
2020-21	91329	-0.71
2021-22	115152	26.08
2022-23	114662	-4.67

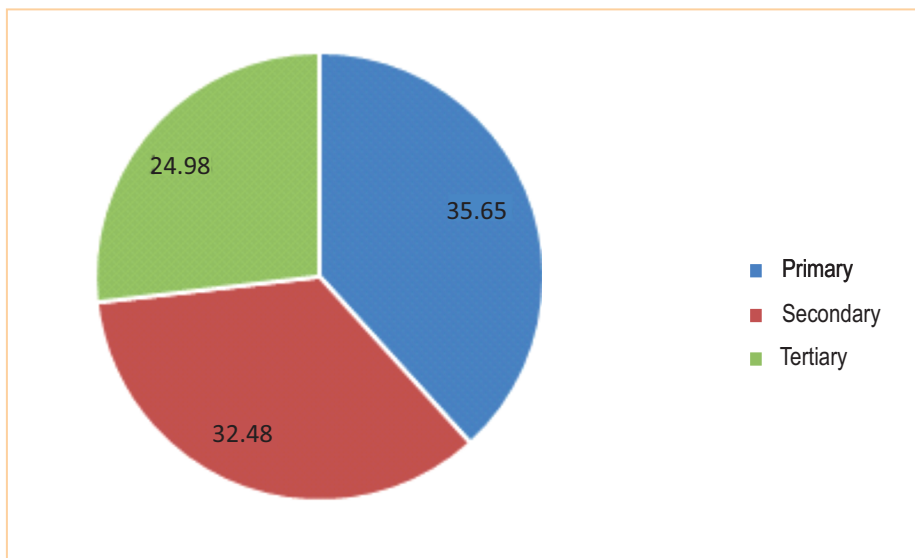

Figure 3.13: GDDP Growth Rate of Peren

**Sectoral Contribution to Gross District Domestic Product (GDDP):**

- 3.6.2.** Structurally, Peren's economy is a primary sector driven economy. The contributory share of the primary sector was 35.65 percent during 2022-23 (Figure-3.14). The sectoral contribution to GDDP during 2022-23 is presented in Table-3.20.

Table-3.20: Sectoral contribution to GDDP at constant price for 2022-23

Year/Sector	2022-23
Primary	35.65
Secondary	32.48
Tertiary	24.98

Figure 3.14: Percentage Sectoral contribution to GDDP at constant price for 2022-23**Per Capita Income of Peren:**

3.6.3. Per capita income (PCI) is simply an average measurement of income which is supposed to be received by each individual if the income of the state is distributed among the total population of the state. It is calculated by dividing the total income of the state by the total population of the state. PCI is often used as an indicator of the standard of living of the people. The year wise PCI of Peren from 2019-20 to 2022-23 is presented in Table-3.15.

Chapter Four

CONCEPTS AND DEFINITIONS

4. CONCEPTS AND DEFINITIONS:

4.1 Gross State Domestic Product (GSDP):

GSDP is defined as the total money value of all the goods and services produced within the economy of a state during a given period of time (usually a year).

4.2 District Domestic Product (DDP):

DDP is defined as the total money value of all the goods and services produced within the geographical boundary of a district during a given period of time (usually a year).

4.3 Gross Value of Output (GVO):

GVO is a measurement of the total value of output produced where the value of produced output also comprises of the value of intermediate goods and services consumed during the process of production.

4.4 Gross Value Added (GVA):

GVA is simply Gross Value of Output (GVO) less consumption of intermediate goods and services during the process of production.

4.5 Base year:

In the estimation of GSDP/DDP, the base year is the year which is taken as the fixed year to assess the real growth of an economy. Presently, 2011-12 is the base year for the purpose of assessing the real growth of the economy.

4.6 GSDP/DDP at current price:

GSDP/DDP estimated on the basis of the current prevailing prices is called as GSDP/DDP at current price.

4.7 GSDP/DDP at constant price:

The GSDP/DDP estimated at current prices may be inflated by the extent of inflation prevailing in the economy. To remove such an artificial increase in the GSDP/DDP owing to price effect, the GSDP/DDP at constant prices is estimated. For all the items estimated using the production approach, it is calculated by multiplying the current production with the base year prices. For items estimated either by expenditure method or income method, the estimated GSVA is deflated by appropriate indexes to arrive at constant estimates.

4.8 Net State Domestic Product (NSDP)/Net District Domestic Product (NDDP) at current prices:

GSDP/DDP estimated at current as well as constant prices does not include the expenses on wears and tears of tools and machineries used in the process of production. Such wears and tears are accounted under 'consumption of fixed capital asset' (CFC). The GSDP/DDP at current prices less CFC is called as NSDP/NDDP at current prices.

4.9 Net State Domestic Product (NSDP)/Net District Domestic Product (NDDP) at constant prices:

The resultant of GSDP/DDP estimated at constant prices less CFC is called as NSDP/NDDP at constant prices.

4.10 Per Capita Income (PCI):

PCI is simply an average measurement of income which is supposed to be received by the citizens of a state if the state's income is distributed among the total population of the state. It is calculated by dividing the total income of the state by the total population of the state.
