ANNUAL PRICE REPORT 2026

PUBLISHED BY:
DIRECTORATE OF ECONOMICS & STATISTICS
NAGALAND: KOHIMA

PREFACE

The Annual Price Report for the year 2026 is the 1st Edition of the new series of Consumer Price Index (CPI) for Rural, Urban and Combined using the base year 2022=100 published by the Directorate of Economics & Statistics, Nagaland.

The Department of Economics and Statistics is the Nodal Agency for collection, compilation and dissemination of price statistics in the state. A vigorous monitoring on prices of essential commodities has become an integral part of the administration for taking policy decisions and market intervention. In this effort, the department is making sure that the price data are properly collected and crosscheck from the source before deriving analysis.

The CPI is a crucial economic indicator for tracking inflation, understanding the economic well-being of individuals and guiding economic policies aimed at promoting price stability and improving living standards. It is widely used in fixing salary and dearness allowance of the employees, making informed decision, pricing strategies, estimation of the state income and forecast future performances.

I acknowledge the District Economics and Statistics Officers and Staff for collecting the required price data in the district price centres. I place on record the contribution rendered by the price section in bringing out the publication.

I hope that the data contained in this report will be useful for policy planners, administrators, research scholars and general public. Comments and Suggestions for improvement of the report are welcome.

SELECTED PRICE CENTRES IN NAGALAND

Sl.No.	Name of District	Urban Centres	Rural Centres
1	Kohima	BOC Market	Chiephobozou
		High School Market	Jakhama
2	Dimapur	New Market	Purana Bazaar
		Railway Station	Rangapahar
3	Mokokchung	Mokokchung Town	Mangkolemba
			Tuli
4	Wokha	Wokha Town	Bhandari
			Sanis
5	Phek	Phek Town	Pfutsero
6	Tuensang	Tuensang Town	Noksen
			Longkhim
7	Zunheboto	Zunheboto Town	Satakha
			Pughoboto
8	Kiphire	Kiphire Town	Seyochung
			Pungro
9	Peren	Jalukie	Athibung
10	Longleng	Longleng Town	Tamlu
			Yachen
11	Mon	Mon Town	Tizit
			Aboi
12	Noklak	Noklak Town	Thonoknyu
13	Chumoukedima	Chumoukedima Town	Medziphema
			Diphupar
14	Tseminyu	Tseminyu Town	Kandinu
15	Shamator	Shamator Town	Chessore
16	Niuland	Niuland Town	Kuhuboto
17	Meluri	Meluri Town	Meluri Village

CONCEPTS AND DEFINITIONS

Price: Price is the amount of money paid for a specified quantity of a good or service in a market transaction at a given point of time.

Retail price: Retail price is the price actually paid by the final consumer for the purchase of a good or service. It includes all applicable taxes and excludes discounts or rebates. Retail prices constitute the basic data used for the compilation of the Consumer Price Index (CPI).

Consumer's price: Consumer price refers to the price paid by households for acquiring goods and services for final consumption.

Consumer: A consumer is an individual or household that purchases goods and services for final consumption.

Goods: Goods are tangible commodities that satisfy human wants and provide utility to consumers.

Services: Services are intangible economic activities provided in exchange for payment and consumed at the time they are rendered.

Subsidized price: Subsidized price refers to the price of a commodity or service after accounting for the subsidy provided by the Government, whereby a part of the cost is borne by the Government.

Price index: A Price Index is a statistical measure that reflects the average change over time in the prices of a fixed basket of goods and services relative to a specified base period. Depending on the purpose, price indices may be compiled using retail, wholesale or producer prices. Price indices are widely used for measuring inflation and analysing price movements.

Index number: An index number is a statistical measure designed to show the relative change in the level of a variable or a group of related variables over time, place or other characteristics. In index number compilation, the value of the base period is conventionally taken as **100**.

Inflation: Inflation refers to a sustained increase in the general level of prices of goods and services in an economy over a period of time.

Consumer Price Index: The Consumer Price Index (CPI) measures changes over time in the retail prices of a fixed basket of goods and services consumed by households. It is an important macroeconomic indicator used for measuring inflation, monitoring price stability, indexation of wages and dearness allowance, and as a deflator in the compilation of National Accounts. The CPI is compiled using the

Laspeyres fixed base weighted index:

$$I_n = \frac{\sum PnQo}{\sum PoQo} X100$$

Where,

I_n=Index Number

Q_o =Base year quantity

P_n = Current year price

P_o = Base year price

Consumer Food Price Index (CFPI): The Consumer Food Price Index (CFPI) measures the change over time in the retail prices of food items included in the Consumer Price Index basket. It is compiled using the food group of the CPI basket and serves as an important indicator of food inflation. CFPI is the index showing the price movement of all the food items excluding the non-alcoholic beverages and prepared meals during the period.

Weight: Weight represents the relative importance of a commodity or service in the consumption basket. It is derived from the share of expenditure incurred on that commodity or service in the total household consumption expenditure during the base period.

Construction of weighting diagram: The whole structure of weight is known as the 'Weighting Diagram'. Weight distribution is prepared by using the "bottom up" method, i.e., add up the shares of each item within a sub group, then subgroup shares into major shares and then add up to arrive at "all commodities" normalized to 100. In other words, all items in the item basket at individual level, sub level, group level and general level were given weight and normalized to 100 at each level. In general, the items which accounted for more than 1 percent of the expenditure in the sub-group and for which regular price series are available are included in the item basket. Those items which are not popular among the target population and have an expenditure less than 1 percent at sub-group level are not included in the index. The weights of items which are not included in the index are either added to a particular allied item or distributed over several items included in the index so that the total expenditure in the average budget is fully taken into account in the weights used in computation of the index. Whereas, certain items which have relative importance and are generally consumed by all the targeted population such as match box, salt etc on which less than 1 percent of consumption expenditure is incurred are directly retained in the basket. It is not feasible to monitor the price behaviour of all the items on which population reported, therefore consumption expenditure on representative items is retained in the item basket which are manageable over time. For this purpose, groups of items which meet similar or related demands of the consumers are formed. There are 6 recognized groups as detailed below:

1. Food Group
2. Pan, Supari, Tobacco & Intoxicants
3. Fuel & Light
4. Housing
5. Clothing & Bedding
6. Miscellaneous

Weighting Diagram

The weighting diagram represents the complete distribution of expenditure weights assigned to items included in the CPI basket. The weights are derived from the **Family Budget Enquiry Survey (FBES)** using a bottom-up approach, wherein item-level weights are aggregated into sub-

groups, groups and finally the overall index, normalized to 100.

Items with significant expenditure shares and for which reliable price quotations are available are included in the basket. Items having relatively small expenditure shares may either be combined with similar items or their weights redistributed among representative items. However, certain essential commodities of universal consumption, such as salt and matches, are retained irrespective of their expenditure share.

The CPI basket is classified into the following six major groups:

1. Food
2. Pan, Supari, Tobacco and Intoxicants
3. Fuel and Light
4. Housing
5. Clothing and Bedding
6. Miscellaneous

Imputation: Imputation is the statistical procedure adopted for assigning expenditure weights or price movements to items that are not explicitly included in the CPI basket. The expenditure share of such items is redistributed to comparable or representative items within the same subgroup or group to ensure complete coverage of household consumption expenditure.

Base year: The base year is the reference period against which price changes are measured in the compilation of an index number. The index for the base year is conventionally assigned a value of 100.

Current year: The current year refers to the period for which the latest estimates or index numbers are compiled and presented.

PRICE COLLECTION SYSTEM IN NAGALAND

The Directorate of Economics and Statistics, Government of Nagaland, is responsible for the collection, compilation, validation and dissemination of retail price statistics in the State. Retail prices of consumer goods, non-consumer goods and building materials are collected on a weekly basis from all 17 districts, covering 19 urban price centers and 27 rural price centers. At the district level, the District Economics & Statistics Officers (DESOs), assisted by their staff and field price collectors, collect retail prices from selected markets and villages in accordance with prescribed procedures. The collected data are scrutinized at the Directorate by Price Supervisors and subjected to validation through consistency checks across markets and over time. Any abnormal price movements or doubtful observations are referred back to the concerned district offices for verification and rectification before finalization.

The Consumer Price Index (CPI) (Rural, Urban and Combined), with base year 2022=100, is compiled using the Laspeyres formula. The weighting diagrams for the current CPI series are based on the average monthly household consumer expenditure obtained from the Family Budget Enquiry Survey (FBES), 2022–23, conducted by the Directorate of Economics & Statistics, Nagaland under the Support for Statistical Strengthening Sub-Scheme of the Ministry of Statistics and Programme Implementation (MoSPI), Government of India. The CPI basket comprises 152 items for the rural sector and 165 items for the urban and combined sectors, reflecting the consumption pattern of households in the State. Retail prices are collected every month according to a pre-determined weekly schedule from the selected urban markets and rural markets. The validated price data are used for the compilation of the Consumer Price Index (Rural, Urban and Combined), which measures the relative movement of retail prices over time. The Directorate compiles and publishes the Consumer Price Index (CPI) Rural, Urban and Combined on a quarterly basis and the Annual Price Report annually. These publications present the comprehensive information on price movements and inflation trends in the State.

HIGHLIGHTS

The Directorate of Economics & Statistics, Nagaland is releasing the Consumer Price Index (CPI) for Rural, Urban and Combined with Base Year 2022=100 for the year 2025. In addition to the CPI for Rural, Urban and Combined, the Consumer Food Price Index (CFPI) for Rural, Urban and Combined has also been estimated. The State-level General (All Groups), Group and Sub-Group indices for CPI and CFPI for Rural, Urban and Combined for the year 2025 are presented in Table 1.

- The General Indices for the year 2025 for Rural, Urban and Combined are 109.77, 110.22 and 110.14, respectively, indicating that the overall consumer price level was 9.77 percent, 10.22 percent and 10.14 percent higher than the base year (2022=100). The Urban index was marginally higher than both the Rural and Combined indices, reflecting broadly similar price movements across the State.
- The Consumer Food Price Index (CFPI), which measures the price movement of all food items (excluding non-alcoholic beverages and prepared meals, etc.), stood at 111.77, 111.51 and 111.40 for Rural, Urban and Combined, respectively. This indicates that food prices were 11.77 percent, 11.51 percent and 11.40 percent higher than the base year. The CFPI remained higher than the General Index across all sectors, indicating that food inflation continued to be the major contributor to overall inflation.
- The Food Group indices for Rural, Urban and Combined are 111.34, 111.27 and 111.11, respectively, indicating that food prices increased by 11.34 percent, 11.27 percent and 11.11 percent over the base year. Within the Food Group, Milk and Milk Products (113.62), Cereals and Cereal Products (113.67) and Meat, Fish and Eggs (112.06) recorded comparatively higher price indices, while Sugar (106.39) and Oils and Fats (108.22) registered relatively lower price increases.
- The indices of Pan, Supari, Tobacco and Intoxicants for Rural, Urban and Combined stood at 109.75, 113.52 and 111.43, respectively, indicating an increase of 9.75 percent, 13.52 percent and 11.43 percent over the base year. Urban households recorded relatively higher price increases in this group.
- The Fuel and Light group recorded indices of 106.22, 106.77 and 106.49 for Rural, Urban and Combined, respectively, indicating increases of 6.22 percent, 6.77 percent and 6.49 percent over the base year. This group recorded one of the lowest increases among the major expenditure groups, suggesting relatively stable fuel prices during the year.
- The Clothing and Footwear group recorded indices of 111.45, 109.56 and 111.19 for Rural, Urban and Combined, respectively, indicating increases of 11.45 percent, 9.56 percent and 11.19 percent over the base year. Within this group, Clothing and Bedding (111.71) recorded a higher Combined index than Footwear (109.19), indicating relatively stronger price increases for clothing items

- The Miscellaneous group recorded indices of 108.11, 109.80 and 109.36 for Rural, Urban and Combined, respectively, indicating increases of 8.11 percent, 9.80 percent and 9.36 percent over the base year. Among its sub-groups, Medical Care (112.72) and Education, Stationery, etc. (112.03) recorded comparatively higher Combined indices, reflecting sustained increases in expenditure on health and education services, while Transport and Communication (104.60) registered the lowest increase within the Miscellaneous group.
- The Housing group, applicable only to urban households, recorded an index of 113.70 in both the Urban and Combined sectors, indicating a 13.70 percent increase over the base year. Among the major expenditure groups, Housing recorded the highest index, reflecting a relatively stronger increase in housing-related costs during the year.

In addition to the State Level CPI, the Department estimates the District Level Consumer Price Index (CPI) for Rural, Urban and Combined sectors using Base Year 2022=100. The district-wise indices are presented in Table 2 to Table 18.

- Urban sector: Over the Base Year 2022, Chumoukedima district recorded the highest increase in CPI (General) at 12.39 percent, with an index of 112.39 for the year 2025, while Kohima district registered the lowest increase at 6.77 percent, with an index of 106.77. Other districts with relatively high Urban CPI were Tseminyu (11.33%), Mon (11.63%), Niuland (11.49%) and Zunheboto (10.74%). In respect of CFPI, Chumoukedima again recorded the highest increase at 14.91 percent, with an index of 114.91, followed by Tseminyu at 13.08 percent, Mon at 13.16 percent and Shamator at 12.06 percent. Kohima recorded the lowest increase at 9.47 percent.
- In the Rural sector, Noklak district recorded the highest increase in CPI (General) at 12.04 percent, with an index of 112.04, followed by Tseminyu at 11.09 percent, Shamator at 10.93 percent and Chumoukedima at 10.73 percent. Mokokchung recorded the lowest increase at 6.83 percent, followed by Kohima at 8.30 percent. For CFPI, Chumoukedima recorded the highest increase at 14.54 percent, with an index of 114.54, followed by Shamator at 14.47 percent, Noklak at 13.91 percent and Tseminyu at 13.10 percent. Phek recorded the lowest increase at 8.38 percent, followed by Kohima at 8.78 percent.
- For the Combined sector, Noklak recorded the highest increase in CPI (General) at 11.48 percent, followed by Chumoukedima at 11.27 percent and Tseminyu at 10.90 percent. Kohima recorded the lowest increase at 8.61 percent, followed by Phek at 8.93 percent. In respect of CFPI, Chumoukedima recorded the highest increase at 14.30 percent, followed by Shamator at 12.91 percent, Tseminyu at 12.81 percent, Noklak at 12.44 percent and Longleng at 12.24 percent. Phek recorded the lowest increase at 9.48 percent.

TABLE I

State Consumer Price Index for Rural, Urban and Combined for the year 2025

Base Year 2022= 100

Group	Sub-Group	Description	Rural		Urban		Combined
